

PDGFRB

Reactivity: Human Mouse Rat

Tested applications: WB FC

Recommended Dilution: WB 1:500 - 1:2000 FC 1:20 - 1:50

Calculated MW: 124kDa

Observed MW: Refer to figures

Immunogen:

A synthetic Peptide of human PDGFRB

Storage Buffer:

Store at 4. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

Catalog #: A1444

Antibody Type:

Polyclonal Antibody

Species: Rabbit

Gene ID: 5159

Isotype: IgG

Swiss Prot: P09619

Purity: Affinity purification

For research use only.

Background:

This gene encodes a cell surface tyrosine kinase receptor for members of the platelet-derived growth factor family. These growth factors are mitogens for cells of mesenchymal origin. The identity of the growth factor bound to a receptor monomer determines whether the functional receptor is a homodimer or a heterodimer, composed of both platelet-derived growth factor receptor alpha and beta polypeptides. This gene is flanked on chromosome 5 by the genes for granulocyte-macrophage colony-stimulating factor and macrophage-colony stimulating factor receptor; all three genes may be implicated in the 5-q syndrome. A translocation between chromosomes 5 and 12, that fuses this gene to that of the translocation, ETV6, leukemia gene, results in chronic myeloproliferative disorder with eosinophilia.
