

GNRHR

Reactivity:Human Mouse

Tested applications:WB IHC IP FC

Recommended Dilution:WB 1:500 - 1:2000 IHC 1:50 - 1:200 IP 1:20 - 1:50 FC 1:20 - 1:50

Calculated MW:38kDa

Observed MW:Refer to figures

Immunogen:

A synthetic Peptide of human GNRHR

Storage Buffer:

Store at 4. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

Synonym:

HH7; GRHR; LRHR; LHRHR; GNRHR1;

Catalog #:A1696

Antibody Type:

Polyclonal Antibody

Species:Rabbit

Gene ID:2798

Isotype:IgG

Swiss Prot:P30968

Purity:Affinity purification

For research use only.

Background:

This gene encodes the receptor for type 1 gonadotropin-releasing hormone. This receptor is a member of the seven-transmembrane, G-protein coupled receptor (GPCR) family. It is expressed on the surface of pituitary gonadotrope cells as well as lymphocytes, breast, ovary, and prostate. Following binding of gonadotropin-releasing hormone, the receptor associates with G-proteins that activate a phosphatidylinositol-calcium second messenger system. Activation of the receptor ultimately causes the release of gonadotropic luteinizing hormone (LH) and follicle stimulating hormone (FSH). Defects in this gene are a cause of hypogonadotropic hypogonadism (HH). Alternative splicing results in multiple transcript variants encoding different isoforms. More than 18 transcription initiation sites in the 5' region and multiple polyA signals in the 3' region have been identified for this gene.
