## CCNF

Reactivity:Human Mouse

Tested applications:WB IHC

 Recommended Dilution:WB 1:500 - 1:2000 IHC 1:50 - 1:200

 Calculated MW:88kDa

 Observed MW:Refer to Figures

 Immunogen:

 A synthetic peptide of human CCNF

 Storage Buffer:

 Store at -20. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

 Synonym:

FBX1; FBXO1 ;

Catalog #:A2709 Antibody Type: Polyclonal Antibody Species:Rabbit Gene ID:899 Isotype:IgG Swiss Prot:P41002 Purity:Affinity purification

For research use only.

## Background:

This gene encodes a member of the cyclin family. Cyclins are important regulators of cell cycle transitions through their ability to bind and activate cyclin-dependent protein kinases. This member also belongs to the F-box protein family which is characterized by an approximately 40 amino acid motif, the F-box. The F-box proteins constitute one of the four subunits of the ubiquitin protein ligase complex called SCFs (SKP1-cullin-F-box), which function in phosphorylation-dependent ubiquitination. The F-box proteins are divided into 3 classes: Fbws containing WD-40 domains, Fbls containing leucine-rich repeats, and Fbxs containing either different protein-protein interaction modules or no recognizable motifs. The protein encoded by this gene belongs to the Fbxs class and it was one of the first proteins in which the F-box motif was identified.
