

RBMS1

Reactivity:Human

Tested applications:WB

Recommended Dilution:WB 1:200 - 1:1000

Calculated MW:45kDa

Observed MW:Refer to figures

Immunogen:

Recombinant protein of human RBMS1

Storage Buffer:

Store at -20. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

Synonym:

YC1; MSSP; SCR2; HCC-4; MSSP-1; MSSP-2; MSSP-3; C2orf12;

Background:

This gene encodes a member of a small family of proteins which bind single stranded DNA/RNA. These proteins are characterized by the presence of two sets of ribonucleoprotein consensus sequence (RNP-CS) that contain conserved motifs, RNP1 and RNP2, originally described in RNA binding proteins, and required for DNA binding. These proteins have been implicated in such diverse functions as DNA replication, gene transcription, cell cycle progression and apoptosis. Several transcript variants, resulting from alternative splicing and encoding different isoforms, have been described. A pseudogene for this locus is found on chromosome 12.

Catalog #:A3079

Antibody Type:

Polyclonal Antibody

Species:Rabbit

Gene ID:5937

Isotype:IgG

Swiss Prot:P29558

Purity:Affinity purification
