HNRNPA0

Reactivity:Human Mouse

Tested applications:WB IHC

 Recommended Dilution:WB 1:500 - 1:1000 IHC 1:50 - 1:100

 Calculated MW:30kDa

 Observed MW:Refer to Figures

 Immunogen:

 Recombinant protein of human HNRNPA0

 Storage Buffer:

 Store at -20. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

 Concentration:

J Synonym: HNRPA0;

Background:

This gene belongs to the A/B subfamily of ubiquitously expressed heterogeneous nuclear ribonucleoproteins (hnRNPs). The hnRNPs are RNA binding proteins and they complex with heterogeneous nuclear RNA (hnRNA). These proteins are associated with pre-mRNAs in the nucleus and appear to influence pre-mRNA processing and other aspects of mRNA metabolism and transport. While all of the hnRNPs are present in the nucleus, some seem to shuttle between the nucleus and the cytoplasm. The hnRNP proteins have distinct nucleic acid binding properties. The protein encoded by this gene has two repeats of quasi-RRM domains that bind RNAs, followed by a glycine-rich C-terminus.
