# ZBED1

**Reactivity:**Human

**Tested applications:**WB IHC

**Recommended Dilution:**WB 1:500 - 1:2000 IHC 1:50 - 1:200

**Calculated MW:**78kDa

**Observed MW:**Refer to figures

**Immunogen:**

Recombinant protein of human ZBED1

**Storage Buffer:**

Store at -20. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

**Synonym:**

ALTE; DREF; TRAMP; hDREF;

**Catalog #:**A6792

**Antibody Type:**

Polyclonal Antibody

**Species:**Rabbit

**Gene ID:**9189

**Isotype:**IgG

**Swiss Prot:**O96006

**Purity:**Affinity purification

For research use only.

**Background:**

This gene is located in the pseudoautosomal region 1 (PAR1) of X and Y chromosomes. It was earlier identified as a gene with similarity to Ac transposable elements, however, was found not to have transposase activity. Later studies show that this gene product is localized in the nucleus and functions as a transcription factor. It binds to DNA elements found in the promoter regions of several genes related to cell proliferation, such as histone H1, hence may have a role in regulating genes related to cell proliferation. Alternatively spliced transcript variants with different 5' untranslated region have been found for this gene.
