LMO1

Reactivity:Human Mouse Rat

Tested applications:WB IHC

 Recommended Dilution:WB 1:500 - 1:2000 IHC 1:50 - 1:200

 Calculated MW:18kDa

 Observed MW:Refer to figures

 Immunogen:

 Recombinant protein of human LMO1

 Storage Buffer:

 Store at -20. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

 Synonym:

TTG1; RBTN1; RHOM1;

Background:

This locus encodes a transcriptional regulator that contains two cysteine-rich LIM domains but lacks a DNA-binding domain. LIM domains may play a role in protein interactions; thus the encoded protein may regulate transcription by competitively binding to specific DNA-binding transcription factors. Alterations at this locus have been associated with acute lymphoblastic T-cell leukemia. Chromosomal rearrangements have been observed between this locus and at least two loci, the delta subunit of the T-cell antigen receptor gene and the LIM domain binding 1 gene. Alternatively spliced transcript variants have been described.
