PDE6A

Reactivity:Human Mouse Rat

## Tested applications:WB

Recommended Dilution:WB1:500-1:2000
Calculated MW: 100 kDa
Observed MW:Refer to figures
Immunogen:
Recombinant protein of human PDE6A

## Storage Buffer:

Store at -20. Avoid freeze / thaw cycles. Buffer: PBS with $0.02 \%$ sodium azide, $50 \%$ glycerol, pH7.3.

## Synonym:

PDEA; RP43; CGPR-A;

## Background:

This gene encodes the cyclic-GMP (cGMP)-specific phosphodiesterase 6A alpha subunit, expressed in cells of the retinal rod outer segment. The phosphodiesterase 6 holoenzyme is a heterotrimer composed of an alpha, beta, and two gamma subunits. cGMP is an important regulator of rod cell membrane current, and its dynamic concentration is established by phosphodiesterase 6A cGMP hydrolysis and guanylate cyclase cGMP synthesis. The protein is a subunit of a key phototransduction enzyme and participates in processes of transmission and amplification of the visual signal. Mutations in this gene have been identified as one cause of autosomal recessive retinitis pigmentosa.

Catalog \#:A7915
Antibody Type:
Polyclonal Antibody
Species:Rabbit
Gene ID:5145
Isotype:IgG
Swiss Prot:P16499
Purity:Affinity purification
