

Phospho-EIF4EBP1-T70

Reactivity: Human Mouse Rat

Tested applications: WB

Recommended Dilution: WB 1:500 - 1:2000

Calculated MW: 13kDa

Observed MW: Refer to figures

Immunogen:

A phospho specific peptide corresponding to residues surrounding T70 of human EIF4EBP1

Storage Buffer:

Store at -20. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

Synonym:

BP-1; 4EBP1; 4E-BP1; PHAS-I;

Background:

This gene encodes one member of a family of translation repressor proteins. The protein directly interacts with eukaryotic translation initiation factor 4E (eIF4E), which is a limiting component of the multisubunit complex that recruits 40S ribosomal subunits to the 5' end of mRNAs. Interaction of this protein with eIF4E inhibits complex assembly and represses translation. This protein is phosphorylated in response to various signals including UV irradiation and insulin signaling, resulting in its dissociation from eIF4E and activation of mRNA translation.

Catalog #: AP0031

Antibody Type:

Polyclonal Antibody

Species: Rabbit

Gene ID: 1978

Isotype: IgG

Swiss Prot: Q13541

Purity: Affinity purification
