Introduction:

GNPNAT1 is a member of the GNA1 subfamily of the larger acetyltransferase family of proteins. GNPAT1 is limited to the Golgi apparatus and the endosome. GNPAT1 is vital for UDPGlcNAc biosynthesis pathway. GNPAT1 catalyzes the synthesis of GlcNAc6P from AcCoA and GlcN6P, a step in the UDP-GlcNAc6P formation pathway.

Storage:

Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. Please avoid freeze thaw cycles.
